REMARKS

The figures of births and deaths shown in this statement for week ending the 11th August, 1956 relate to 177 towns with an estimated population of 24,690 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 56% of the total number of towns representing 59% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 13,352 and 5,815 representing birth and death rates of 28.1 and 12.2 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 138 towns with an estimated population of 19,116 thousands. Information about Madhya Pradesh, Madras and West Bengal could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 55% of the total number of towns representing 57% of the total population is covered. The number of births

and deaths recorded in these towns were 10,864 and 4,831 representing birth rates and death rates of 29.6 and 13.1 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 39 towns with an estimated population of 5,574 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 60% of the total number of towns representing 69% of the total population is covered. The number of births and deaths recorded in these towns were 2,488 and 984 representing birth and death rates of 23.2 and 9.2 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
